

Product Brief

Juno Lighting Group Introduces AccuLite Finia Series Outdoor LED Luminaries

Des Plaines, Ill., May 17, 2011 — Juno Lighting Group®, a subsidiary of Schneider Electric, and a leader in innovative commercial and residential lighting solutions, today introduced its new series of high performance AccuLite Finia Series Outdoor LED Luminaries. Featuring a unique design, these versatile and energy-efficient luminaries can be pole-mounted, wall-mounted or mounted as a flood light in commercial applications, wherever an attractive and energy efficient luminaire is needed. Each series includes a high performance configuration with maximum fixture efficacy as well as a more economical version for the budget-conscious project.

The LA Series is a performance architectural LED area light designed for medium mounting heights in pedestrian scale applications, such as outdoor malls, store fronts, parks, and pedestrian areas. Custom designed, high performance molded TIR optics shape the LED light with a Wide Throw, a Forward Throw, or a round Type V distribution. The luminaires feature direct mounting to square pole for single or back-to-back installation and optional arm for fixtures mounted at 90 degrees.

The LF Series is a performance architectural flood light designed for landscape, façade, and signlighting applications. It features custom designed, high performance molded TIR optics that shape the LED light with either an asymmetrical or a round symmetrical distribution. The LF Series also includes thermal management features like deep fins for increased heat dissipation, and an air cooling channel that separates the LED compartment and the electronic driver. The fixture can be supplied with a slip fitter or trunion, and accessories for ground, wall, and pole mounting are also available.

The LW series is a performance architectural wall mounted LED luminaire ideally suited for commercial applications where a low profile, high performance fixture is needed, such as for security or emergency lighting. Custom designed, high performance molded TIR optics shape the LED light with either a Wide Throw, a Forward Throw, or a Wall Wash distribution.

Additional features of the AccuLite Finia Series Outdoor LED Luminaries include:

- A heavy wall die cast aluminum body, back box, and frame that delivers a sturdy, durable fixture and a tempered glass lens that completely seals and protects the LED compartment
- Two, three, or four LED modules depending on the light output/wattage selection
- An IP65 full fixture rating that keeps all its critical components safely protected from a variety of weather conditions and enables the fixture to be aimed upwards for façade or decorative lighting.
