Juno Lighting Group Introduces Highly Efficient, Attractive LED Wall Wash Fixture Series

Des Plaines, Ill., September 9, 2010 — Juno Lighting Group®, a subsidiary of Schneider Electric, and a leader in high-quality, innovative commercial and residential lighting solutions, today announced the addition of its Trac-Master® T256LED wall wash/flood fixtures for Juno Line Voltage Trac. With a highly cost effective, energy efficient design that incorporates low-maintenance LED technology within an attractive low-profile aesthetic; the T256LED series offers powerful, uniform output capable of producing more than 2000 lumens per watt while only consuming 35 watts nominal. T256LED fixtures are the ideal wall wash or floodlighting solution for a wide variety of retail and commercial applications.

Equipped with a custom heat-sink built directly into the slender fixture housing, the T256LED provides outstanding thermal management without exposed fins often found on other LED fixtures. The concealed thermal management also assures the LEDs will reach or exceed their 50,000 hour maintenance-free rated service life, further reducing total cost of ownership.

Other features of the T256LED Series include:

- A vast array of color temperature choices, including 2700K, 3000K, 3500K and 4100K
- Dimming option to accommodate applications requiring varying light levels
- 90-degree vertical aiming
- A slightly diffuse lens to shield LEDs and optical components from dust and contaminants
- Exterior white, black or silver finishes

Juno Trac-Master T256LED wall wash/flood fixtures are currently available through Juno Lighting Group distributors. For more information regarding the T256LED Series, visit www.junolightinggroup.com.

About Schneider Electric

Schneider Electric, a global specialist in energy management, is a leader in offering high-quality, innovative commercial and residential lighting solutions and advanced system controls. Schneider Electric provides lighting fixtures offered in the product ranges of Juno®, Indy™, AccuLite™, Aculux®, NaviLite® and DanaLite.
