FOR IMMEDIATE RELEASE

NAVILITE ADDS THREE NEW PRODUCTS TO EXIT AND EMERGENCY LIGHTING LINE *Designs Offer Aesthetic and Reliable Solutions*

DES PLAINES, Ill. (September 12, 2007) — NaviLite[®], a Juno Lighting Group[®] brand, has introduced three new emergency and exit lighting products for commercial applications.

Recessed edge-lit exit signs, recessed emergency gimbals and thermoplastic emergency units join other NaviLite products that offer high performance and versatile installation options.

NaviLite Recessed Edge-Lit Exit Signs

The NaviLite recessed edge-lit exit signs are unobtrusive to any décor, with their premium aluminum trim, crystal clear acrylic face panel, rounded corners and soft finishes. The signs are available in both ceiling and wall-mounted versions, and they include bar hangers suitable for joist or suspended ceiling applications.

The signs are manufactured with high output LEDs, providing energy efficiency and reduced maintenance. In addition, the exit signs are UL 924 listed and comply with NFPA 101 Life Safety Code, NEC and OSHA requirements.

NaviLite NRG Recessed Emergency Gimbal

The NRG emergency gimbal is a recessed fixture designed to blend smoothly with the ceiling, providing emergency lighting with minimal disruption to

the building's interior design. A 6V 8W bi-pin halogen lamp combined with a PAR 36 size lens and reflector offer powerful illumination for corridors and doorsteps. In addition, the fully adjustable gimbal allows users to aim the light beam precisely to illuminate specific areas. It comes with a six-inch steel recessed housing with bar hangers. Battery and electronics are placed within the housing.

NaviLite N4 Thermoplastic Emergency Unit

The N4 series of emergency lighting units are designed to be powerful and user-friendly. The combination of two PAR 36 size adjustable heads with spread lens delivers a beam pattern optimized to illuminate exits or corridors. The different lamp configurations available can increase the spacing between fixtures, thus reducing wiring, installation time and maintenance costs.

Redesigned snap-in mounting improves the ease of installation. The fixtures come in a black or white finish, and a remote load capable model is available, along with choices of lamp wattage.

All NaviLite products are backed by a five-year limited warranty against defects in material or workmanship on all components, excluding the batteries (which are warranted on a pro-rata basis).

NaviLite®

The NaviLite line of exit and emergency lighting products include exit signs, emergency lighting units, remote heads, options and accessories to suit practically any application. NaviLite products are premium quality and comply with the latest codes and performance standards.
